LECTURE NOTES

Authored by
Lachlan J. W. Wyer

Document Start Date: 19th of June 2026
Latest Update: June 19, 2026

Contents

1 Introduction **2**
1.1 Electricity: 2
1.2 SI Units: 2

1 Introduction

1.1 Electricity:

Through this is a steady of moving charges and their interaction until magnetic and electric fields change this. Charges move because a net force have been applied. The force comes from a difference in charge between two points on a circuit.

1.2 SI Units:

$$1\ Coulomb = 6.25 \times 10^{18} e^{-}$$

$$1A = \frac{1Q(Coulomb)}{1t(Seconds)}$$
